ABSTRACT

Study Objectives:

Background:

Method:

Results:

Conclusions:

INTRODUCTION

Background:

High prevalence of risky behaviors among youth, widespread destructive behaviors, poor sex education, risky sex

Study Objectives:

Examine rates of risky behaviors and STDs among substance dependence (SD) youths and preteen sex, risky sex

STUDY SAMPLE

SUBJECTS

Participants were selected for linear modeling

Measures:

- Demographic variables
- Clinical characteristics
- STD incidence

Statistical Analysis Plan

- Population
- Sample
- Study design
- Analytical approach

RESULTS

- Sample
- Study design
- Analytical approach

- Analysis
- Significance

ACKNOWLEDGMENTS

The authors would like to thank Paige Veta and Brittany Roppel for their helpful contributions with data collection and management. We also gratefully acknowledge the collaborations of Mike Hartry, Sue Tang, and New Directions staff. Deep thanks to the Illinois Department of Children and Family Services for their support.

CONFLICT OF INTEREST STATEMENT

The authors disclose no financial or other conflicts of interest to disclose.

GRANT SUPPORT

This study was supported in part by a grant awarded to SMD (NIH-DA15307) from the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and a grant awarded to JH (F1559) from the Foundation for Alcohol and Drug Prevention Research.

SCHOOL OF MEDICINE

Case Western Reserve University School of Medicine, Cleveland, OH.
